

SHAHZOAB KHAN (SHAZZ)

Software Engineer

ABOUT ME

As a Senior Software Engineer with over 10 years of experience, I specialize in building dynamic, high-performance web applications. My engineering DNA is deeply rooted in frontend architecture, but I operate fluidly across the full stack to deliver end-to-end features.

I leverage a modern, TypeScript-driven stack, utilizing React and Next.js for scalable client-side architecture alongside Nest.js for building robust, secure RESTful APIs. My technical approach prioritizes seamless user experiences, efficient data fetching, and highly maintainable systems.
